If you have any questions, please call _____ at (919) 783-4888

GASTROINTESTINAL ENDOSCOPY

You have been scheduled for gastrointestinal endoscopy also called esophagogastroduodenoscopy (EGD). The purpose of this test is to identify any abnormalities in your esophagus, stomach and/or duodenum by passing a flexible fiber optic tube through your mouth and down the back of the throat into the esophagus. The results obtained from this test may explain the cause of symptoms such as abdominal pain, nausea, reflux, or difficulty swallowing.

HOW DO I PREPARE FOR THE EXAM?

Do not have anything to eat or drink after midnight the night prior to the exam. Please notify our office immediately if you are taking any blood thinners (Coumadin, Plavix, Aggrenox or any other blood thinners), or any diabetic medications. Please follow the enclosed instructions.

WHAT OCCURS DURING THE EXAMINATION?

You will be sedated for the exam with the drug Propofol by anesthesia and monitored by the nurse anesthetist. A cannula will be placed in your nostrils to administer oxygen through. Please notify our office of any medication allergies and or allergies to soybeans or eggs. The physician will use a small, lighted flexible fiber optic tube, thinner than most of the food you swallow to examine the lining of the upper digestive tract. The procedure does not obstruct breathing passages. The physician may biopsy (take tissue samples) during the examination. The specimens will be sent to a pathologist for examination under the microscope. Biopsies are not painful.

ARE THERE ANY POSSIBLE COMPLICATIONS?

An EGD is safe and is considered a very low risk procedure. Complications can occur but are rare. Possible complications include: hemorrhage (bleeding), perforation (tearing) of the esophagus or stomach, pneumonia, or an adverse reaction to the medications used of sedation.

WHAT CAN I EXPECT AFTER THE PROCEDURE?

Do not eat or drink anything for one hour after your exam. You may feel sleepy for several hours after the examination. Do not plan to return to work, drive, or sign any legal documents for the remainder of the day. You may experience a mild sore throat lasting one or two days after the exam. You may use throat lozenges or salt water gargles for relief. If a biopsy is taken during your examination, our office will call you with your pathology results in 7-10 days.
